

The Medieval Lottery Outline

Using the outline information you will collect below, create a three to five minute video using either the class laptops and Pinnacle 17 (Possibility of using chroma keyed backgrounds) or iMovie on your iPad (If you are more comfortable with this) that you can incorporate the information you have gathered from above into a digital story. The video should thoroughly discuss all aspects of your life as the character you received in as much detail as possible. You will dress in costume during the filming of your production in order to get into character. (Costumes are available for each of the medieval characters from the school costume room or you can bring something appropriate to your character from home.) You may also use props you have created or can bring from home as they help relate the digital story of your life in Medieval Europe. You may also choose to use either medieval videos (Discovery Education Account) or Medieval music to enhance and support your presentation. You will each have to create a story board for your digital story in your StoryBoard that account. Each of you completed videos should be saved into your class dropbox folders so they can be easily accessed. Medieval Digital Stories will begin on Monday, February 23rd and proceed until finished.
